MULTIMEDIA ASSEMBLY:

Are our children technologically literate? Do they have strategies to succeed in our new world? For decades, the amount of time our kids spent on screens has been growing. Now, screen time and sleep are the top two activities of our kids. Today, our screens are stealing sleep from our kids. Sadly, sleep deprived, screen zombies are in no condition to learn in our classrooms. Teachers can't compete with these screens that are turning even the best of our children into ticking timebombs. It's time to steal some of this screen time back from the tech giants and teach our kids how to thrive in our digital culture.

WHY NOW?

- Nashville and Seattle are among over 40 nationwide districts demanding accountability from big tech in an effort to combat a rise in mental health issues, and other disruptions linked to students' use of social media. The lawsuits allege that social media giants, including Facebook, Snapchat, and TikTok, knowingly cause harm to children with "malicious" algorithms that exploit the developing brains of youth, hooking them on "positive feedback loops of excessive use and abuse."
- Lawsuits like these can take years to work themselves through our courts. BUT NOW, our program can help give your students, teachers and parents tips and ideas to combat this incredible influencer.

TESTIMONIALS

- *NEW PROGRAM. Be the first to share a testimonial of how this helped you!*

GET DUSTI ON YOUR CALENDAR NOW!

- Dusti Howell, Ph.D. was a professor of Instructional Design and Technology for over two decades. In his doctoral training, he studied both the education benefits and the negative side effects of technology on kids. He ran the 'TekEffect' thinktank at Emporia State University which looked for ways to glean the educational benefits while side-stepping the potholes and car wrecks on the educational superhighway. He's presented his TWS (Time Well Spent) strategies in the Netherlands, UK, Malaysia, and America.
